Hello,

Thanks for taking the time to read this short report I have whipped up for you. I will not bore you or waste a lot of your precious time with a 100+ page report. I'll try to keep this to about a 5 minute read at most. Hopefully you will discover a few answers behind the question.....

“Why do I suck at internet marketing?”

Do you ask yourself this question often when you can't seem to make even one lousy dollar online? I know I did a lot, and even still now sometimes. But I've learned a lot.....especially in the last 12 months online. I am now earning *at least* one dollar a day...lol

It can be really frustrating when you don't get the results you want or expect can't it? You feel like you're literally banging your head against a brick wall.

If you're reading this report, it means you want to make your marketing online **“NOT SUCK”**. So here are just a few questions I think have gone through your mind...perhaps on more than one occasion.

Q. Is anyone even seeing my ads? Let alone clicking on them....

Q. Why are people newer to internet marketing than me making more money online than me already?

Q. Why have I been promoting my squeeze page like crazy and still have less than 50 subscribers?

Q. When I mail out, do my emails even get read? (Ever mailed out to over 5000 people and didn't get 1 sale? I have!)

Q. Why did I have a little rush of success and now there is a drought? Is everyone ignoring me!!!??

Q. Feel like giving up completely and going back to a job digging holes?

If you have asked these questions to yourself before, you are not alone. I understand completely.

But.....**Don't give up just yet! Yes, I'm here to save the day!**

Here's the question that you should be asking yourself NOW!

"How do I improve my marketing and start to make money online consistently and when I want to?"

Here's where I let you in on a BIG secret. Ready? Ok...

A lot of people trying to make it big online lack 2 major things. No, make that 3!

1. They lack **"Visualization"**. Not to be confused with "Vision" that is important too, but that comes much later on. Visualization means you visualize your own success. This is key.

Try this. Picture in your mind yourself in the position you want. Picture yourself driving the car you want, living in the house you want, feel the feeling of satisfaction and accomplishment because you've reached your goals. Do you feel better now? Visualizing and feeling is the first key to success.

2. They lack **"Knowledge"**. Even if you have all the driven excitement in the world, you can't do anything without knowing **how to** do that which will bring you success. You need to study up.

If it's online success you are looking for, which I figure it is, you need to study up on internet marketing strategies.

What works? Easy question. It all works. Whatever it is, it depends on how well you market it. Simply put, you need to know how to sell. After you get some selling skills, you need to know how to make a web site,

or even better, a web site that sells. Are you catching my drift?

Now for my last and most important step.

3. They lack **“Doing it”**...for lack of a better word. JUST DO IT! All the books and software in the world won't make you a penny if they sit in your computer doing nothing. All the drive and “I wanna make a million bucks on the internet” excitement will get you no-where fast without action!

So what if you're not perfect. Who is? So what if your web site is not converting at 100%. Who's is? The important thing is getting it out there with the bare minimums to accomplish your purpose (ebook sale, lead capture, adsense, banners, whatever). You can always change it and make it better.

I'm a perfectionist which is a real pain when trying to make websites or even writing reports :), but I have to just get out there, do it and hope for the best. If it **SUCKS**, I'll change it.

Don't be afraid to try...actually, there is no try, only DO!

I hope you learned something from this report. It's short but there are some gems of knowledge here. These are the fundamentals I keep in my mind when I'm working online and they *do* work.

To your internet marketing sucking no longer,
Stuart Stirling

PS- Want to find out more about how to kick butt online even more and say goodbye to your crappy day job in 90 days or less? Check out mine and buddy James Brown's [“Crush Your Job”](#) report. It's a million times better than this one :)

If you have any comments or questions, I'd be more than happy to hear them. Email 'Stuart' here – admin@crushyourjob.com
